CLAIM

The ornamental design for cap and pan roof tile, as shown and described.

DESCRIPTION

FIG. 1 shows a top perspective view of a cap tile according to the present invention.

FIG. 2 shows a bottom perspective view of the cap tile of FIG. 1.

FIG. 3 shows a right side view of the cap tile of FIG. 1.

FIG. 4 shows a front view of the cap tile of FIG. 1, the rear view being the same.

FIG. 5 shows a left side view of the cap tile of FIG. 1.

FIG. 6 shows a top view of the cap tile of FIG. 1.

FIG. 7 shows a bottom view of the cap tile of FIG. 1.

FIG. 8 shows a top perspective view of a pan tile according to the present invention.

FIG. 9 shows a bottom perspective view of the pan tile of FIG. 8.

FIG. 10 shows a right side view of the pan tile of FIG. 8.

FIG. 11 shows a front view of the pan tile of FIG. 8, the rear view being the same.

FIG. 12 shows a left side view of the pan tile of FIG. 8.

FIG. 13 shows a top view of the pan tile of FIG. 8.

FIG. 14 shows a bottom view of the pan tile of FIG. 8.

FIG. 15 shows a perspective view of the cap and pan roof tile in combination according to the present invention.

FIG. 16 is a second embodiment of FIG. 2, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment.

FIG. 17 is a second embodiment of FIG. 7, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment.

FIG. 18 is a third embodiment of FIG. 2, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment.

FIG. 19 is a third embodiment of FIG. 7, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment.

FIG. 20 is a fourth embodiment of FIG. 2, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment; and,

FIG. 21 is a fourth embodiment of FIG. 7, the only difference being the location of the four protuberances, it being understood that all other surfaces are the same as those of the first embodiment.

Portions or features of the cap and pan roof tile shown in broken lines in the drawings form no part of the claimed design. Portions or features of the cap and pan roof tile absent in the drawings form no part of the claimed design.
